**HealthPLUSAlabama**

**340B Certification**

**Effective July 1, 2016**

Per Alabama Department of Public Health ("Department") policy effective **July 1, 2016**, when the cost of prescription medication is funded by the Department through the HealthPLUSAlabama ("HPAL") program, by payment of the clients' insurance premiums and co-pays for the medication, the Department is entitled to any 340B pricing discount or rebate. Organizations, covered entities, and their contractors otherwise eligible for 340B Discount Pricing may not utilize the 340B discount purchasing program with regards to HPAL clients' prescription medications, either at the time of the prescription fill nor subsequently by conversion to 340B pricing via virtual inventory.

Accordingly, all claims generated after **June 30, 2016** and submitted for payment to HPAL must include or be accompanied by the following language and identifying information on the invoice, claim form, or accompanying cover letter, which certifies that all claims submitted are for non 340B medications. Alternatively, a signed copy of this form may be submitted with the invoice or claim.

By signing below, the undersigned certifies that all medications in the enclosed or attached invoice or claim have **not** been purchased under the 340B Drug Pricing Program. The pharmacy or other organization identified below also certifies that neither it, nor its agents, will retroactively convert prescriptions for which co-pays are being claimed to 340B stock via virtual inventory or other electronic means.
